Contents of Volume 64

Volume 64, Number 1, May 5, 1975

AUTHOR INDEX, Volume 64, Number 1 ii

OSKAR OSTER, GEORGE W. NEIREITER, AND FRANK R. N. GURD. Observation of Deuterium-Labeled Diacetyldeuteroporphyrin Incorporated in Cyanoferrimyoglobin by Resonance 1

SHLOMO ROTTEM. Heterogeneity in the Physical State of the Exterior and Interior Regions of Mycoplasma Membrane Lipids 7

D. DESAIAH AND R. B. KOCH. Inhibition of Fish Brain ATPases by Aldrin-Transdiol, Aldrin, Dieldrin and Photodieldrin 13

KIMIHIKO OKAZAKI. Evidence for Existence and a Tentative Identification of Coenzyme in Yeast Thiamine Pyrophosphokinase 20

B. BOETTCHER AND M. MARTINEZ-CARRION. Glutamate Aspartate Transaminase Modified at Cysteine 390 with Enriched Carbon-13 Cyanide 28

ALEEM SIDDIQUI AND IVAN D. GOLDBERG. Demonstration of a Competence-Enhancing Factor in Supernatants of *Neisseria gonorrhoeae* F62 Type T1 . . . 34

GARY J. BLOMQUIST, MICHAEL A. MAJOR, AND JAMES B. LOK. Biosynthesis of 3-Methylpentacosane in the Cockroach *Periplaneta americana* 43

NICHOLAS J. NARDACCI, JOHN P. JONES, ANNE L. HALL, AND ROBERT E. OLSON. Synthesis of Nascent Prothrombin and Albumin in a Heterologous System Using Rat Liver Messenger RNA Purified on Oligo (dT)-Cellulose . . . 51

IAN GROSS, SEAMUS A. ROONEY, AND JOSEPH B. WARSHAW. The Inhibition of Enzymes Related to Pulmonary Fatty Acid and Phospholipid Synthesis by Dietary Deprivation in the Rat 59

BABU P. VADLAMUDI, JAMES D. DZANDU, AND PETER F. LARWAY. Differential Solubilization of Human Erythrocyte Cell Membrane Proteins by Maleic Anhydride 64

S. R. WAGLE AND L. SAMPSON. Studies on the Differential Response to Insulin on the Stimulation of Amino Acid Incorporation into Protein in Isolated Hepatocytes Containing Different Levels of Glycogen 72

PETER K. WAYNE, JILL FETELL, AND ORA M. ROSEN. Measurement of Cyclic 3′,5′-Adenosine Monophosphate Synthesis in Growing *Escherichia coli* 81

MICHAEL D. TOPPING AND WINIFRED M. WATKINS. Isoelectric Points of the Human Blood Group A^1, A^2 and B Gene-Associated Glycosyltransferases in Ovarian Cyst Fluids and Serum 89

RAYMOND CHOLLET, LEWIS L. ANDERSON, AND LUCRETIA C. HOVSEPIAN. The Absence of Tightly Bound Copper, Iron, and Flavin Nucleotide in Crystalline Ribulose 1, 5-Biphosphate Carboxylaseoxygenase from Tobacco 97

MICHEL RICHARD, AMBROISE MARTIN, AND PIERRE LOUISOT. Evidence for Glycosyl-Transferases in Rat Liver Nuclei 108

G. ROMEY, R. CHICHEPORTICHE, M. LAZEUNSKI, H. ROCHAT, F. MIRANDA, AND S. LISSITZKY. Scorpion Neurotoxin—A Presynaptic Toxin which Affects Both Na^+ AND K^+ Channels in Axons 115

JEAN-PAUL VAN EERD, AND KENJI TAKAHASHI. The Amino Acid Sequence of Bovine Cardiac Troponin-C. Comparison with Rabbit Skeletal Troponin-C . . . 122

AGUSTINA GARCIA, JOHN D. NEWKIRK, AND RICHARD D. MAVIS. Lung Surfactant Synthesis: A Ca^{++}-Dependent Microsomal Phospholipase A_2 in the Lung 128

LOUIS J. LIBERTINI AND JESSE ADAMS. Poly(rA): Oligo(dT)-Directed DNA Polymerase Activity in Carcinogen Induced Rat Mammary Tumors and in Normal Tissues 136

A. ROTHSTEIN, Z. I. CABANTCHIK, M. BALSHIN, AND R. JULIANO. Enhancement of Anion Permeability in Lecithin Vesicles by Hydrophobic Proteins Extracted from Red Blood Cell Membranes 144

JEAN A. HAMILTON, L. K. STEINRAUF, AND BRADFORD BRADEN. Beauvericin and Divalent Cations: Crystal Structure of the Barium Complex 151

NORIO AWATA, MASUO MORISAKI, AND NOBUO IKEKAWA. Carbon-Carbon Bond Cleavage of Fucosterol-24,28-Oxide by Cell-Free Extracts of Silkworm *Bombyx mori* 157

W. D. W. HESTON, BARRY R. ZIRKIN, AND DONALD S. COFFEY. Release of Chromatin Template Restriction in Rabbit Spermatozoa 162

DON SENS AND ERIC JAMES. Regulation of *argE* mRNA Synthesis, Performed *in Vitro* 169

C. I. KADO AND P. F. LURQUIN. Studies on *Agrobacterium tumefaciens*. IV. Nonreplication of the Bacterial DNA in Mung Bean (*Phaseolus aureus*) 175

GARY W. BRITTON, SAMUEL ROTENBERG, AND RICHARD C. ADELMAN. Impaired Regulation of Corticosterone Levels During Fasting in Aging Rats . . . 184

CLAUDIO NICOLINI AND RENATO BASERGA. Circular Dichroism Spectra and Ethidium Bromide Binding of 5-Deoxybromouridine-Substituted Chromatin . . 189

MARIE JOSEPHE DUCHESNE, AHMAD A. ATTALLAH, AND JAMES B. LEE. Human Serum Albumin (HSA) Decreases Prostaglandin A_1 (PGA_1) Metabolism . 196

H. SHUMAN AND M. SCHWARTZ. The Effect of Nalidixic Acid on the Expression of Some Genes in *Escherichia coli* K-12 204

ALEXANDER BLOCH. Uridine 3',5'-Monophosphate (Cyclic UMP) I. Isolation from Rat Liver Extracts 210

JIM PATRICK, JIM BOULTER, AND JEAN CHIN O'BRIEN. An Acetylcholine Receptor Preparation Lacking the 42,000 Dalton Component 219

MARGUERITE LEMONNIER AND ROLAND BOURRILLON. Structural and Immunological Studies on a Sialoglycopeptide Isolated from Human Urine . . 226

EUGENE A. BAUER, GEORGE P. STRICKLIN, JOHN J. JEFFERY, AND ARTHUR Z. EISEN. Collagenase Production by Human Skin Fibroblasts, . . . 232

PETER RAPP, HIDEHIKO KUMAGAI, HIDEAKI YAMADA, TAMIO UENO, AND HIROSHI FUKAMI. Synthesis of 2,3,4-Trihydroxy-L-Phenylalanine from S-Methyl-L-Cysteine and Pyrogallol by L-Tyrosine Phenol-Lyase 241

EDITH WILSON MILES. Effects of Modification of the β_2 Subunit and of the $\alpha_2\beta_2$ Complex of Tryptophan Synthase by α-Cyanoglycine, A Substrate Analog . 248

DENIS G. WILLIAMSON AND DONALD S. LAYNE. Effect of Conjugation to Glucose on the Uptake of 17β - [6,7-^{3}H] Estradiol by Rabbit Liver Subcellular Fractions 256

KENNETH R. WILLIAMS AND PETER SCHOFIELD. Evidence for Metalloenzyme Character of tRNA Nucleotidyl Transferase 262

P. R. HUBER, J. FRECH, AND H. I. WYSS. Effect of Calf Endometrium Nuclei on Human Estradiol Receptor Complex; an *in Vitro* Study 268

J. J. ELLIOT AND A. J. S. BALL. A New Mitochondrial Mutation in *Saccharomyces cerevisiae* 277

WILLIAM M. BONNER AND HARVEY B. POLLARD. The Presence of F3-F2a1 Dimers and F1 Oligomers in Chromatin 282

J. F. KOSTER, R. G. SLEE, AND J. FERNANDES. On the Biochemical Basis of Herediatary Fructose Intolerance 289

R. M. CAPRIOLI AND W. E. SEIFERT. Hydrolysis of Polypeptides and Proteins Utilizing a Mixture of Dipeptidylaminopeptidases with Analysis by GC/MS . . 295

JENG-JONG SHIEH AND RONALD L. SASS. The Molecular Structure of Palmitylcarnitine Chloride 304

FUMIO SAWADA. Covalent Attachment of 4-Thiouridylic Acid to Ribonuclease A by Near-Ultraviolet Radiation 311

WILLIAM DeW. HORROCKS, JR., ROBERT F. VENTEICHER, CURTIS A. SPILBURG, AND BERT L. VALLEE. Lanthanide Porphyrin Probes of Heme Proteins. Insertion of Ytterbium(III)mesoporphyrin IX into Apomyoglobin . . 317

E. A. SIESS AND O. H. WIELAND. Improved Response of Isolated Liver Cells to Glucagon in the Presence of Rat Serum 323

S. RAJALAKSHMI AND D. S. R. SARMA. *In Vivo* Chain Elogation of Hepatic DNA: 1-β-D-Arabinofuranosyl Cytosine Sensitive and Insensitive Steps . . . 331

PETER P. McCANN, CHANTAL TARDIF, PIERRE S. MAMONT, AND FRANCIS SCHUBER. Biphasic Induction of Ornithine Decarboxylase and Putrescine Levels in Growing HTC Cells 336

ANNE-LISE PICHARD AND JEAN-CLAUDE KAPLAN. Effects on N^6, 2'-O-Dibutyryl Cyclic AMP upon the Interconvertible Forms of Cyclic AMP Phosphodiesterase from Human Platelets 342

AUTHOR INDEX, VOLUME 64 1324

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 X 11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the IUPAC-IUB Document No. 1 *(Arch. Biochem. Biophys.* (1966) **115**, 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a footnote,** rather then in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the **Archives of Biochemistry and Biophysics (1974) 160,** iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 X 8 in.); the original drawings should be no larger than 8.5 X 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index, 1969.* Note the following examples.

For a journal article:

1. Chattoraj, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys, 142, 363-370.

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.
